# Only a pandemic is stopping the rise

**120 years of CO2 emissions from fossil fuels**  
billions tonnes

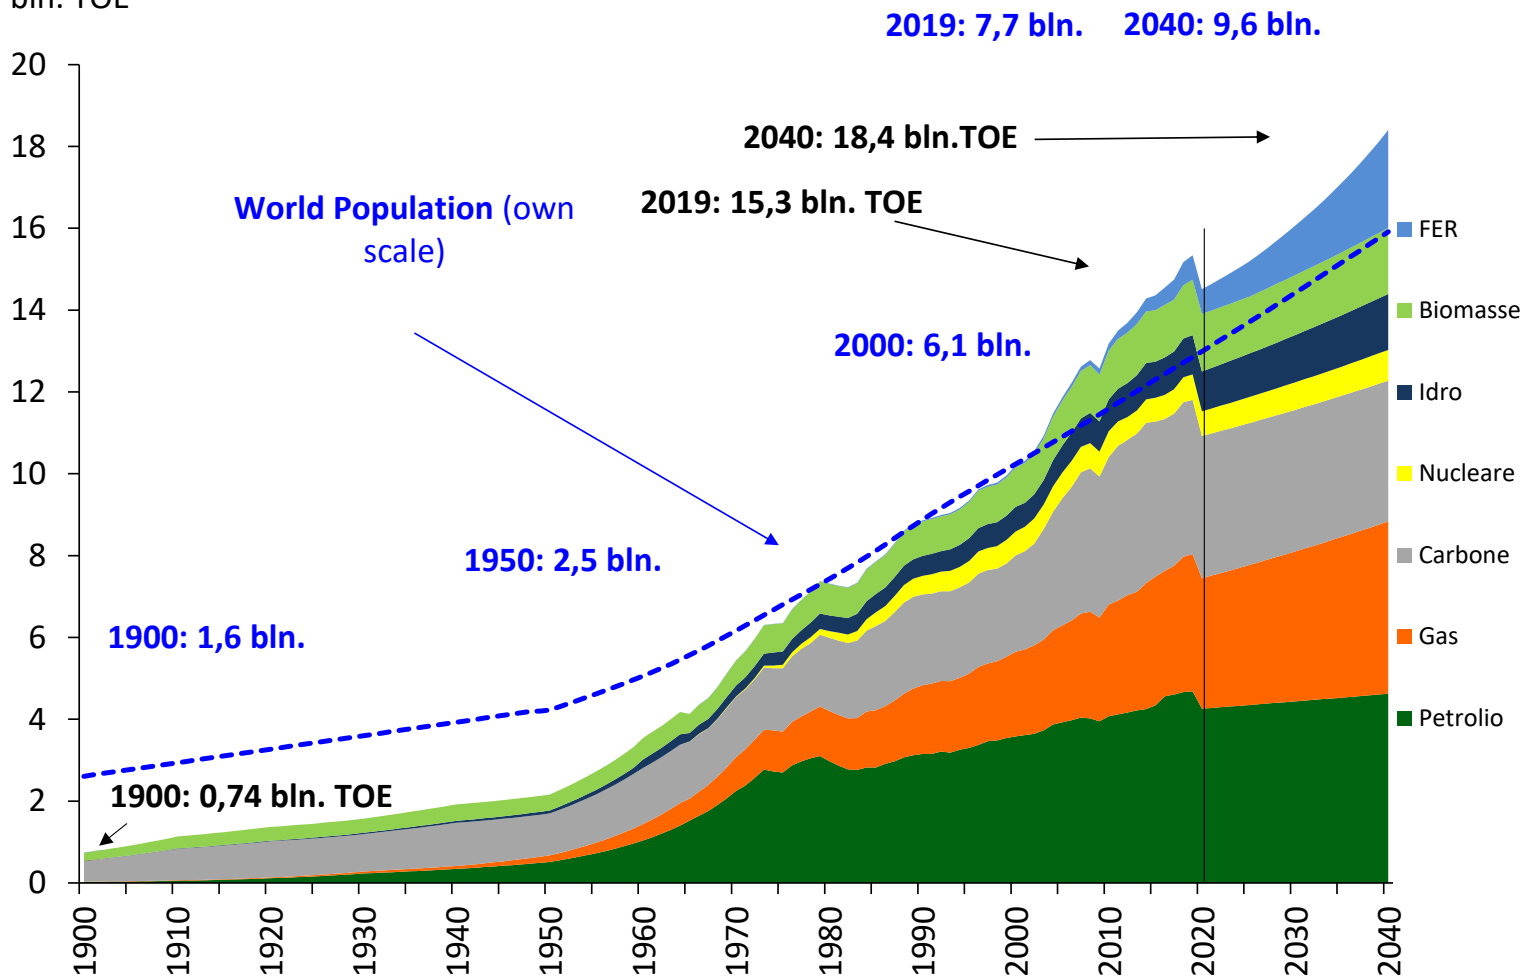

Source: Nomisma Energia calculation on data from Carbon Dioxide Information Analysis Centre, BP, IEA, ISPRA per l'Italia.

# Not even the pandemic is not denting the reliance on fossil fuels

## World Energy Consumption and Population

bln. TOE

## Ambitious Europe far ahead in targets

**European Union CO2 emission; actual and targets**  
Milion tons
